

ZES Systems

CERTIFICATE

This Certificate confirms that the ZES Systems mounting system for solar panels has been tested and certified against the applicable EuroCodes. It is therefore suitable for use for its intended purpose, in accordance with its installation guidelines.

The testing was done by an independent Engineering firm to ensure unbiased and truthful results.

Applicable EuroCodes

- **NEN-EN 1991-1-3:** Loads due to snow on the structural design of buildings and civil engineering works.
- **NEN-EN 1991-1-4:** Actions due to natural wind on the structural design of building and civil engineering works.
- **NEN 7250:** Application of solar energy systems as an integrated or stand-alone element of buildings.

Applicable Products

Solar panel mounting system for slanted roofs.

Testing

The testing and analysis of the product was done by SII-Netherlands.
